

Anti-Slip Stair Covers

Stair Nosing & Tread Cover Datasheet

The QuartzGrip™ DDA compliant range of Anti-slip Safety Products includes Stair Tread Covers and Stair Nosing. All are manufactured from corrosion resistant Glass Reinforced Plastic (GRP) and have been designed for easy installation onto existing concrete, timber or steel surfaces.

A hard-wearing Silicon Carbide Grit is applied to the top surface to provide an effective Anti-slip finish which outperforms conventional aluminum or rubber material in terms of slip resistance.

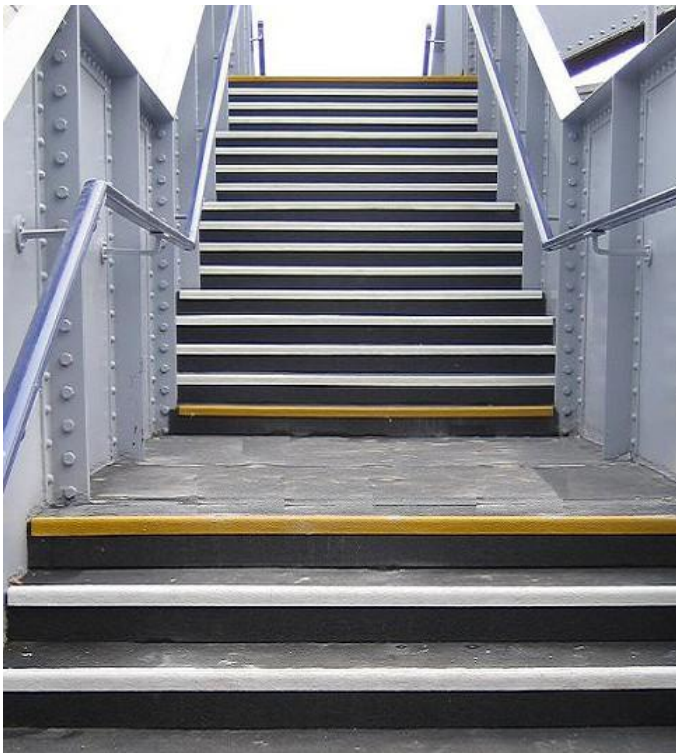

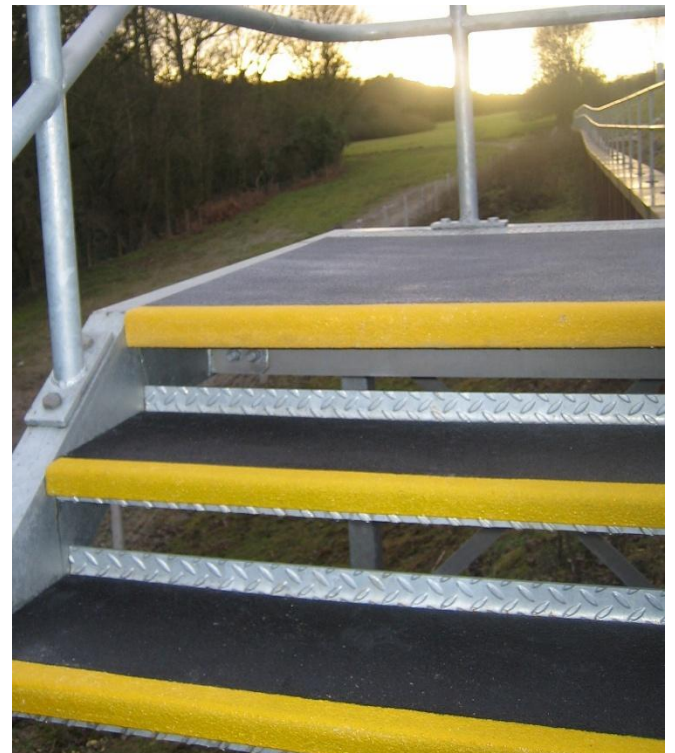

Stair Nosing

Colours available black, beige, white and yellow

Stair tread and Landing Covers

- Anti-slip covers for steps and stair treads
- Maximum size 3660mm length, 345mm depth with 55mm drop
- All covers can be cut to size to suit your individual requirements ready for installation
- Standard tread colours are grey, beige and black with white or yellow nosing
- Standard thickness is 4mm but customer thickness and colours are available upon request.

Our Anti-slip stair treatments can be used to improve safety on timber, steel, stone or concrete steps. Installation is quick and easy – simple glue into position and screw down. Designed to last for years, the only maintenance they; even need is quick clean with a jet wash.
